Asia name meaning in english

The tiny urban state of Singapore, an ultra-modern country of skyscrapers, well-maintained parks and greenbelts, clean air, and prosperity, is a surprise in this part of the world, writes Asia correspondent Wendy Justice. Ancient restored Chinese-style shopping houses and 19th-century colonial buildings lie in the shadows of towering condominiums, financial companies, banks and global corporations, making it a unique mix of past, present and future. Located just one degree north of the equator, Singapore is an island immediately south of the Malay Peninsula. It is a short, five-minute drive across the Strait of Singapore from the southernmost Malaysian state of Johore. Due to its tropical space, the weather is constantly warm and humid, and high temperatures rarely exceed the low-90s, with lows rarely dipping below the mid-70s. Since it's an island, refreshing sea breezes offer relief from the heat, a rare advantage of the Southeast Asian subcontinent. Located in non-earthquake-prone areas of neighboring Indonesia, Singapore is largely protected from natural disasters. Monsoons lie further north, although intense tropical rain can occur at any time. It wasn't so long ago that Singapore was little more than a malaria-infested jungle port home to mostly Malay fishermen and traders from the Middle East, India, China, and points to the confluence of what took advantage of its favorable location on several major routes of spice trade. The British understood Singapore's potential and in 1819 Sir Stamford Raffles set up an outpost to make the island one of Britain's most lucrative commercial and military centres. The island succumbed to the Japanese during World War II in 1942, and in 1945, after the surrender of Japan, it returned to British rule, the rest of the British colony until 1963, when it became an independent republic. Today, many magnificent British buildings remain used, hidden among skyscrapers, serving as government buildings, banks, theatres, and museums. In addition to these buildings, Britain has left another legacy-its language. Although the dialect is uniquely Singaporean, English remains the de facto language of Singapore. In addition, Singapore grants official status to Chinese, Malay and Tamil languages. As a result, although the cornucopia of languages is heard throughout the country, Westerners may feel safe that English will be spoken and understood by almost any Singaporean you want to meet. Singaporeans are proud of their history, and historical markers throughout the city detail the changes that have occurred over the years. Along the Singapore River, for example, bronze statues show scenes from the day the country was rough and tumble in the port city, with ghettos sprawled along the banks of the river and traders and con men hustling into chaos. Today, Singapore has one of the busiest ports in the world, and the Singapore River is clean enough to only one advantage of Singapore's efforts to rise to the challenge of becoming a modern, developed country. Fines for littering made Singapore one of the cleanest countries in the world. Some visitors complain that it is so clean now that it looks vaguely sterile. The heavy-handed government that characterized the early republic of Singapore relaxed, though, and today Singapore is a safe and comfortable place to live. There are almost no crimes. Many Southeast Asian cities have grown into large metropolitan areas with little focus on urban planning. Singapore is once again distinguishing its neighbours in this regard. From small parks and playgrounds in the gardens of almost all high-rise condominium complexes to large city parks, botanical gardens and natural preserves, in this densely populated but well-planned country it is easy to find peace and quiet. With 23% of land made up of natural and forest preserves, Singapore has one of the highest percentages of reusable land in any country in the world. Bukit Timah Nature Reserve, East Coast Park, Fort Canning and beautiful Chinese gardens are just a few minutes away. Another monument to urban planning is Singapore's transport system. Public transport here is one of the best in the world. Modern and clean light rail trains cover many parts of the country, making the journey from one end of the island to the other in less than an hour. Buses that are modern, clean and often serviced in almost all areas that are not easily accessible by train, with comfortable seats and sophisticated GPS systems that allow passengers to view the bus route at any time. Taxis are also ... and calculated data, another exception to the norms of Southeast Asia. The use of private vehicles is discouraged. If you drive, you will be charged high license and petrol charges, in addition to road usage charges, which are automatically charged using electronic devices mounted on dashboards in all Singapore vehicles. The result of this system is good air quality, rare traffic jams and well-maintained streets, with wide city boulevards and controlled free driving trails. Kathleen Peddicord P.S.
